Summary

Visual Designer with a Marketing Mindset

Design is my thing, with marketing tied in. As an award-winning designer with dual Master's degrees, I've gained specialised experience through placements at Fortune 500 companies and collaboration with top-tier global automakers. I work across branding, graphic design, and UI/UX, with a sense for aesthetics that not only look good but resonate with audiences. I bring a portfolio of work recognised by industry-leading international and Australian design awards, backed by High Distinctions across all visual design courses.

Experience
